Gravity Stormwater upgrade for the new C.C.C Mongkok Church, Kai Oi School.

August 2018

A Gravity stormwater upgrade was required after completion of the new C.C.C Mongkok Church Kai Oi School on Sham Mong Road in Sham Shui Po, Kowloon.

The new 560mm OD PE100 RC CCTV pipe has a single green stripe indicating gravity stormwater use. It connects the storm water collection point at the school into the existing DSD concrete gravity Stormwater main below Sham Mong Road.

Further portions of the DSD concrete Stormwater mains are programmed to be replaced with 630 OD PE in the near future as Hong Kong undergoes its world class transition from concrete to 100 year PE pipe systems in its drainage network.
